

Research Trends and Opportunities in Supply Chain Sustainability

This panel will include faculty that have done extensive research on sustainability in the supply chain. The research emphasis in this area has evolved, from focusing primarily on individual company pollution to influencing suppliers, to taking a broader supply chain and social perspective today. The panelists will discuss the methods, theories and topics that are emerging, as well as the on-going challenges in making a substantive contribution to this growing body of research.

Panelist include:

Lisa Ellram, Rees Distinguished Professor of Supply chain Management, Miami University, Oxford, OH

Wendy L. Tate, Associate Professor of Supply Chain Management, University of Tennessee, Knoxville, TN

Zhaohui Wu, Associate Professor of Supply Chain Management, Oregon State University, Eugene, OR

Greg Magnan, Professor, Albers School of Business and Economics, Seattle University, Seattle, WA.

Anne Quarshie, Visiting Researcher at Rutgers Business School and Ph.D. Candidate at Aalto Business School, Finland.
